

## polysulfone

Udel® GF-120 resin is a 20% glass fiber reinforced polysulfone compound. Glass fiber substantially increases the rigidity, tensile strength, creep resistance, dimensional stability and chemical resistance of the polysulfone resin. The high performance properties and attractive price make

these resins particularly effective alternatives to metals in many engineering applications.

#### **Notes**

Typical properties: these are not to be construed as specifications.

- <sup>1</sup> Maximum Temperature of Use: 149°C (300°F)
- <sup>2</sup> Tested at 82 °C (180 °F) (Commercial Hot)
- <sup>3</sup> These flammability ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions.
